This list gives an indication of the types of content which may be chargeable but is not exhaustive. On occasion there may be circumstances beyond our control which may lead to data being deducted from your Plan's data allowance, we will endeavour to ensure this never happens. The Data Passes each include an additional 200MB data boost. This additional data allowance will be used in the same way as your Plan's data allowance (if you are on a Sharer plan only the account lead can receive this additional 200MB). This data will be added to your account when your plan data renews each month and does not roll over. This additional 200MB is not ringfenced for use in connection with the Content Apps.
13. We will not stop you from tethering other devices to your mobile device. However, the Data Passes are not designed for this type of use and so we cannot guarantee that any data you use when tethering will be zero rated.
14. We may add or remove Content Apps from either of the Data Passes at any time. We will notify you at least 30 days in advance of removing any Content Apps, unless there are reasons we can't (for example, if a content provider doesn't give us enough notice that they're withdrawing their content).
15. In order to provide the Data Passes we will monitor your access to the Content Apps. We'll process this information in accordance with EE's privacy policy, details of which can be found here <http://ee.co.uk/privacy-policy>.
